-- NOTES --  
**TimberMart-South**  
 Established 1976

**How the information is obtained and processed:**

TimberMart-South provides standard forms for reporting market activity to a broad cross section of the timber industry -- both companies and individuals -- who are actively engaged in the day to day operation of selling and buying timber. We include all types of arms-length transactions such as bid and negotiated sales. From these reports, over each quarter, the data are sorted out and tabulated to arrive at high and low groupings of price ranges. From these an average is obtained for each product by area and state.

Data published herein is gathered with diligence and from sources considered reliable. However, we are not responsible for errors or omissions. Information is gathered and published as it exists, and each price is independently determined; that is, not based on mathematical relationships with other items. No attempt to set or influence prices is intended. **These are not absolute lows or highs; but an average of lows and average of highs.**

Specific prices, because of variations in field work and time element, sometimes result in prices which are somewhat lower or higher than those published. **BE AWARE THAT PRICES VARY GREATLY DEPENDING ON MANY FACTORS AND A REPORTED PRICE DOES NOT REPRESENT THE ONLY PRICE AT WHICH AN ITEM HAS BEEN SOLD.**

**Log Rule and Weight Equivalents:**

*There is considerable variability in conversion factors across the Southeast U.S. Log size, species type, and wood density have a large influence on factors. Use local conversions when possible.*
